

AIAI

Association for the Improvement
of American Infrastructure

**What membership of AIAI
can mean for your organization**

AIAI is an action-driven, member-led organization made up of the leading minds in the industry, dedicated to moving P3s forward and strengthening American infrastructure.

Our mission is two-fold: facilitate education among the public sector, and advance legislation through targeted advocacy. We aim to provide civic leaders with the knowledge they need to make informed decisions about the benefits of public-private partnerships, such as economic development, life cycle cost savings, risk transfer and accelerated project delivery.

Member participation includes:

- An education and collaboration platform
- Executive roundtable discussions
- Legislative support
- Public owner education program
- State and local advocacy
- Virtual workshops
- Webinars
- Contribution to resource publications
- Networking opportunities

Director

CLAUDIO ANDREETTA
Director of P3 Business Development

Director

SIA KUSHA
Senior Vice President

Director

LISA BUGLIONE
Executive Director

Our Members

Our Members

Committees

AIAl's committees provide a valuable opportunity for member participation.

In addition to the ten committees, AIAl hosts a number of working groups in areas including airports, finance and the P3 Coalition.

COMMUNITY BASED INFRASTRUCTURE

Raising awareness of the value and benefits of P3 for municipal facilities and other vertical infrastructure assets, the predominant activities align with and are produced in conjunction with the Education Committee.

Chair: Tad Guleserian, CDC Companies

DIVERSITY & INCLUSION

The committee assesses the merits and challenges associated with DBE goal setting and programs during the operations and maintenance phases. This joint initiative with the O&M Committee includes participants from both the public sector and the concessionaires.

Chairs: Joe Lewis, BTG; Angela Berry Roberson, WSP

EDUCATION

The foundation for AIAl's mission, delivering education, information and resources for public officials. Additionally, the group raises P3 awareness through webinars and topic-specific industry conversation and workshops throughout the US.

Chair: Sallye Perrin, WSP

ENERGY INFRASTRUCTURE

Demonstrating P3 as a means to lower energy costs for owners; reduce carbon emissions; eliminate deferred maintenance; and advance clean and renewable energy projects through long-term, life cycle-focused DBFOM procurements. Examining modernization of and improvements to existing and new government-owned facilities.

Chair: Frederic Brassard, Alma Global Infrastructure

GOVERNMENT AFFAIRS

At the Federal level, this committee is focused on building dialogue with pro-P3 stakeholders, and advocating legislative and administrative proposals in support of P3s. The committee addresses issues common to P3s and engages at the state level.

Chairs: Patrick Rhode, Cintra; Nathan Robinson, Fluor

LAW & LEGISLATIVE

This committee focuses on shoring up seemingly stable P3 markets and introducing new possibilities to emerging markets, recommending best practices for legislative frameworks, responding to calls to action to establish viable P3 programs and monitoring changes in the legislative landscape.

Chair: Rodney Moss, Hunt Companies

OPERATIONS & MAINTENANCE

The O&M Committee looks to anticipate changes that could positively affect the P3 marketplace, respond to potential threats towards P3 growth and expansion, and support advocacy outreach for the P3 model.

Chairs: Claudio Andreetta, JCI; Andrea Warfield, Fluor

RISK & PERFORMANCE

Risk and performance security has been an engaging topic of late. Education and advocacy efforts of the committee have focused on P3 offices at the state level and in meetings with key staff of committees of jurisdiction on Capitol Hill and the USEPA.

Chair: Stephen Rae, Liberty Mutual

TRANSPORTATION INFRASTRUCTURE

Promoting innovative procurement methods including P3 to deliver critical transportation infrastructure projects at the Federal, state and local level. Fostering understanding of best practices to facilitate private investment and participation in project delivery to enable modernization and improvement to existing and new publicly owned assets. Promoting P3 as a tool for the public sector to achieve innovation in the design and development; funding and financing; delivery; and life cycle performance of assets.

Chair: Bryan Kendro, RS&H

WATER INFRASTRUCTURE

Committee members continue to provide thought leadership at industry forums, sharing best practices and practical experiences related to water P3s. Coordinating with other committees to work towards defining initiatives in the water sector.

Chair: Henry Patel, Kiewit

Association for the Improvement
of American Infrastructure

What could membership of AIAI mean for you?

"AIAI membership is about making a difference. As a smaller organization, we are able to participate on a level plane with companies many times our size."

Regular Member, under \$100 million.

Membership of AIAI is unique to each organization. The level of engagement creates the foundation for business opportunity and industry recognition. It begins with a commitment to support the association, to work together to raise awareness of the value of P3s, develop best practices and shape policy, to help the public sector embrace a greater understanding of P3s as a viable procurement option.

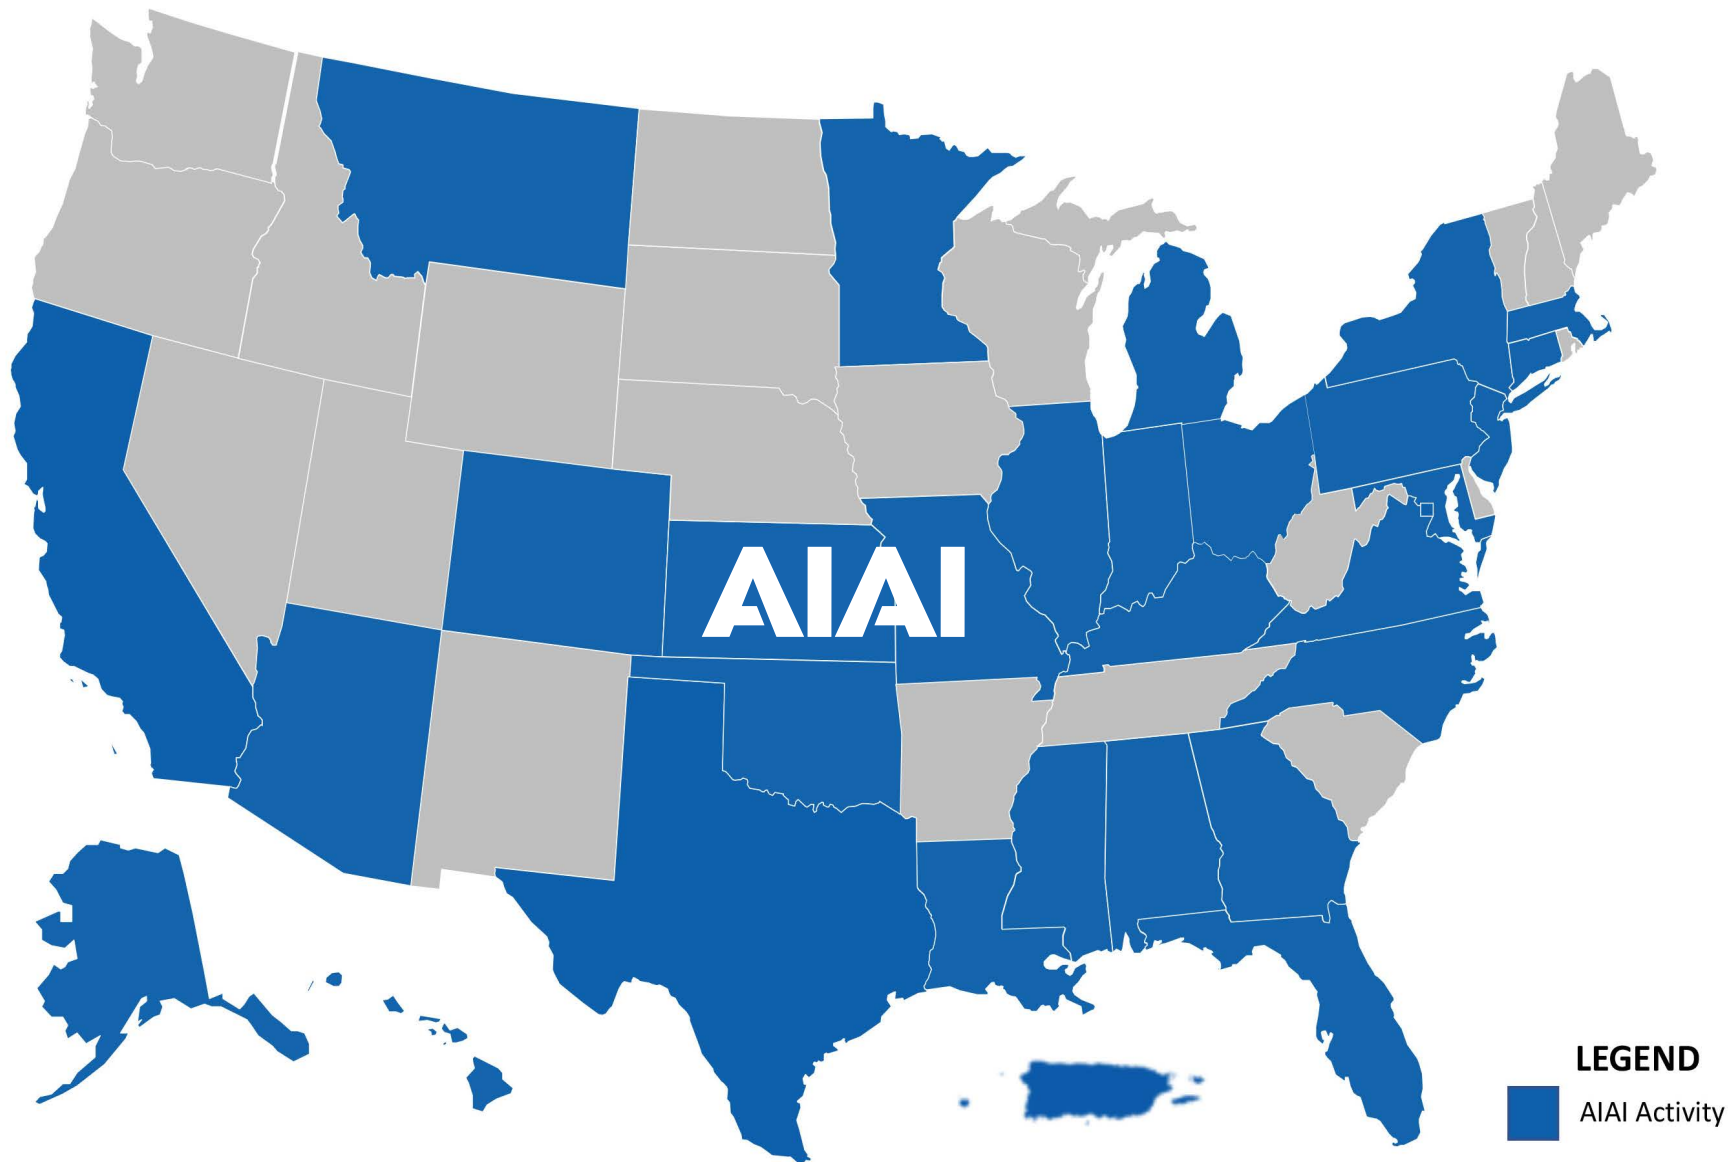

Membership is a platform to connect and strengthen relationships, create organizational and individual visibility, lead industry conversations and impact the growth of a robust pipeline, resulting in business development opportunities that create significant and measurable value.

Typical member opportunities:

- **Visibility and networking**
- **Public sector outreach**
- **Regular legislative updates**
- **Inclusion in education programs**
- **Speaker opportunities in panels, webinars and roundtables**
- **Committee membership**
