

Association for the Improvement
of American Infrastructure

GOAL

Educate leaders – elected, appointed, civil service – in the state/market about the benefits available for infrastructure delivery and ownership through innovative project delivery models including P3s.

Support leadership - provide support and resources to P3 “champions” as they promote alternative delivery and build on best practices as a means to deliver value to their communities

Understand the political and legal framework in state/market in terms of legislative authority, political realities, budget constraints, and infrastructure needs in order to help AIAI members make better decisions when working in the [STATE] market.

Connect AIAI members and state/market infrastructure leaders and aligned industry stakeholders, and forge new personal connections between AIAI members.

Build the foundations for a solid P3 project pipeline in the market, across all applicable infrastructure classes and sectors.

PROPOSED ACTIVITIES

Meetings with Key Officials

- Governor and/or staff
- State Infrastructure-Related Agency Heads and/or staff
- Key Legislative Leaders, Committee Chairs or P3 Bill Sponsors
- Mayors and/or staff, where appropriate
